SCROLLING AND NAVIGATION

Use the Up ▲ and Down ▼ navigation arrows to scroll up or down through lists. Use the right and left navigation arrows to go to other screens when indicated by the Prompt Line or to move the cursor right or left when entering text.

When you scroll to a line on the display, that line is selected. The selected line is highlighted in black and white letters. The softkey labels will change according to the options available for the highlighted line. The OK button is a shortcut for the default action. For example, when you select an entry in your Contacts list, pressing OK places a call to that person.

AVAYA MENU

You can use the Avaya Menu to adjust and customize options and settings for your telephone, access additional web-based applications, get information about your phone and network settings, and log out. The menu choices you see depend on whether or not your administrator has set up Web (WML) applications for your phone.

When no Web applications are set up and the administrator has not customized the menu options, the Avaya Menu has five sub-menus:

- Options & Settings
- Browser
- Network Information
- Log Out
- About Avaya one-X

When Web applications are set up and the administrator has customized the menu options, the Avaya Menu has:

- at least one WML application
- a Phone Settings option containing a sub-menu of the same options and settings available on the regular (non-WML) Avaya Menu

QUICK REFERENCE GUIDE 9620 IP TELEPHONE

The WML-based Avaya Menu may also have:

- a Browser option
- a Network Information option
- Log Out
- About Avaya one-X

Options & Settings lets you change your call settings, personalize button labels, adjust brightness and contrast, select your ringing pattern, and more.

The Browser menu contains additional web-based applications. (If no web applications are available for your phone, the Browser menu is not shown.)

Network Information shows a summary of network-related parameters for your phone.

About Avaya one-X provides the release number of your telephone software.
